I agree that a 4-day school week and a 3-day weekend would be a good idea because it would give us a better study-life balance. Students would have more time to spend with their families or friends, and also more free time to enjoy hobbies. They could even use this free time to do self-study, or learn some new skills and have new experiences that would be useful in the future. A longer weekend would reduce stress and increase students' happiness, which would make them more motivated to study hard at school. (92)

反対意見の解答例

I disagree that a 4-day school week and a 3-day weekend would be a good idea because students would not have enough time to properly study and learn at school. They would have the same amount of work to finish, but they would have less time to do it. This would lead to much more stress and homework, and then students would not be able to enjoy longer weekends. It would also not be good for those students who enjoy doing club activities, because a shorter week would limit the amount of time in which they could practice. (98)
